

UGT2B7 Antibody

(50 µL)

Catalog Number: **DRD26173**

Store at -20°C.

FOR RESEARCH USE ONLY

Detroit R&D, Inc.

Alternative Names: UGT2B9; UDPGTH2; UDPGT2B7; UDPGT 2B9

Preparation: Polyclonal antibody for UGT2B7 was produced by immunization of a rabbit with a recombinant human UGT2B7 protein.

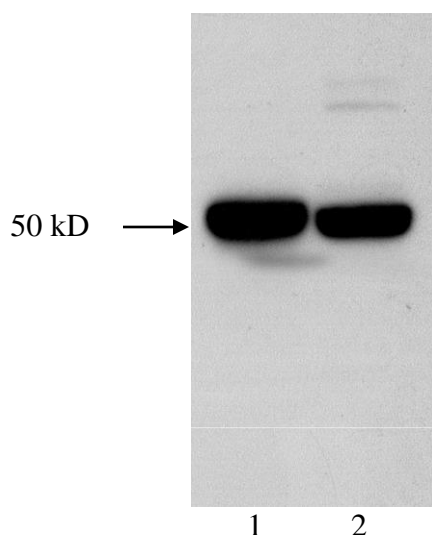

Specificity: The antibody recognizes UGT2B7 from human and rat.

Form: liquid; PBS, pH 7.4, with 50% glycerol and 0.02% azide.

Storage: Avoid repeated freezing and thawing by dividing the contents into aliquots and storing at -20°C.

Western Blot: Dilute antibody 1:1000-1:2500 in TBS containing 5% non-fat milk and incubate for a minimum of two hours. We recommend a 1:5000 dilution of conjugated anti-mouse secondary antibody in TBS containing 5% non-fat milk for 1 hr incubation.

IHC: We recommend diluting the antibody 1:50-1:200 with an overnight incubation.
